

The process of the School in the present moment

“Those who wish to pursue this process will register with the School before the 28th of February 2010. If they are accepted, they will begin their work with a first meeting on Saturday the 20th of March. They will continue with a second meeting on Saturday the 19th of June, concluding this stage of meetings on Saturday the 18th and Sunday the 19th of September. Those wishing to enter the School remain in a period of 'waiting and reflection'. If this proves to be the case they will need to choose a Discipline and begin their work as Apprentices with 2 hours of work every Saturday until their mentors consider them in conditions to participate as Disciples. When the Disciples successfully conclude their disciplinary process and the activities suggested by their mentors, they may present themselves for an 'examination of work'. With this, the 'second round' of 2010 will be completed.”

On the 20th of March 2010 a second round of works of leveling will begin.

Those interested in these works can register, as of now, at the following address: nivelacionpostulantes2010@gmail.com.

With this round, the process, which has contemplated the work of two rounds, will close for a long time.

Those who have finished the process of leveling in 2009 can postulate themselves, if this is what they desire, to begin the work as an apprentice in a Discipline.

For this they should register between December 15th and January 30th 2010 at the following address: disciplinas2010@gmail.com, indicating which discipline they have chosen and communicating their full name, country and the city where they reside.

The participation in the disciplinary works is not automatic and whoever is accepted will receive a personal invitation with the necessary indications in order to begin these works.

The work in any of the Disciplines will last for one year, including the period of learning.

All of the works of School will be carried out in the Parks.
